

THE GCS ARCHIPEL 97-1 HAS BEEN LAUNCHED!

The Groupement de Coopération Sanitaire (GCS, Healthcare Cooperative Association) in Guadeloupe Archipel 97-1, as an extension to the regional healthcare agency, has been created to implement the Regional Healthcare Project which sets out the guidelines and the actions to take in order to guarantee an improvement in the delivery of healthcare in the region, for both healthcare professionals and for patients.

Therefore, a strategic regional healthcare plan has been determined in order to define the framework for healthcare policy in Guadeloupe, and ensure the policy is implemented correctly and is sustained.

In this context, the GCS 97-1 is pleased to announce the launch of **the Regional Healthcare portal " Courbaril "**.

LAUNCH OF THE "COURBARIL" REGIONAL HEALTHCARE PORTAL

Designed for healthcare professionals in the region, the purpose of this platform is to deliver **useful services** and information to **improve patient management**.

The platform offers a **collaborative and secure digital workspace**. By pooling technical resources and by exchanging information in a fully dedicated space, professionals gain efficiency and contribute to the **improvement of healthcare delivery**.

A FULL RANGE

The Courbaril portal deploys a set of high-performing tools that benefit the patient. It offers advantages **for the general public**:

- Keep up to date with medical and environmental news in the Guadeloupe region ,
- Keep an eye on alerts and health monitoring,
- Quickly find a healthcare professional, whatever the specialty,
- Be more aware of the healthcare delivery in the region, etc.

Simple and **secure** services for **healthcare professionals**:

- Access to a personalized workspace,
- Discuss and collaborate with colleagues,
- Share folders and documents,
- Monitor patients' healthcare path,
- Save time on daily tasks

... all available simply by registering!

- A **telemedicine** service to put doctors and patients in contact, as well as create contact between the physicians themselves,
- **Telesurveillance** to remotely interpret a patient's data and to define the most appropriate management,
- An **operational service inventory** that comprehensively lists all of the healthcare delivery systems in Guadeloupe and the Iles du nord,

As well as: a **secure healthcare messaging service**, a healthcare **alert service**, a **regional imaging platform**, etc.

Since its creation on November 18, 2014, the GCS has already brought together public and private healthcare establishments, urban healthcare professionals (Doctors, laboratories, etc.), medico-social facilities for the "elderly" and the "disabled" and **is pursuing its objective of uniting healthcare professionals for the purpose of improving healthcare delivery and monitoring for patients.**

See you, the 16 th of september 2015, on the "<https://www.esante-guadeloupe.fr>" portal, to find innovative health services of Guadeloupe and Northern Islands region.
